

# Momentum International Equity Note

## (UMMIEA)

### Investment Objective

The exchange traded note (ETN) invests in Momentum Securities’ International Equity Portfolio. This portfolio has a global focus determined to maximise risk adjusted returns to investors over the medium to long-term by investing in concentrated listed equity positions. The returns of this portfolio are reliant on the ability of our portfolio management team to identify and take positions in both undervalued and growth orientated shares in a consistent manner that will in time deliver returns in excess of the portfolio benchmark.

### Investment Profile

- Investors with local JSE trading accounts looking for easy to access global equity exposure.
- Investors with ZAR portfolios that want access to the Momentum Securities investment capabilities directly from their existing stockbroking account.
- Investors looking to allocate a portion of their portfolio to an actively managed global equity allocation in ZAR via the JSE (Ticker UMMIEA).

# Economic Overview

In March Regional US bank failures were averted by Fed action with the addition of extra liquidity into the US banking system. The Fed has however, continued to hike its Fed Funds Rate as US service inflation has remained sticky at 6%. Goods inflation has however fallen, and investors have taken heart from this decline pushing up the US equity market.

Slower US economic growth and a potential credit contraction have largely been ignored by equity investors and are concerning factors that will come into play in the second half of 2023.

China’s economy has rebounded since it unlocked last year, and consumption has recovered strongly. The Chinese real estate sector is expected to stabilize but not be the strong driver of growth as it was in the past.
