

Balanced Portfolio

Investment Objective

This is a balanced investment portfolio focused on capital growth over a minimum investment period of five years. It has less risk when compared to a pure equity portfolio in that it offers diversification into multiple asset classes. The portfolio follows an actively managed multi-asset investment strategy that may incorporate passive investments such as exchange traded funds and index funds exposed to the main asset classes in the local and global markets. The portfolio aims to outperform the median managed South African MA high equity collective investment scheme's return on investment.
